

Oilsands Quest Inc. is a dynamic public company involved in oil sands exploration and development in Alberta and Saskatchewan. We are applying our technical expertise to develop multiple global-scale discoveries while aggressively exploring Canada's largest contiguous oil sands land holding. We are growing quickly and need competent team players who can hit the ground running and contribute to our growing success. We currently have an opening for a:

## Senior Reservoir Engineer – Full Time

This Calgary-based position will require periodic travel to our operation sites in Saskatchewan and Alberta.

**Responsibilities** include:

- Investigating the best manner in which to execute analysis and recommendations to progress from the testing stage to commercial production schemes.
- Identify resource requirements in a timely manner.
- Ensure close collaboration with reservoir characterization programs through laboratory results, simulation models and in the field.
- Collaborate with Geologists and Geophysicists to ensure data management and optimum geology architecture for recovery scheme analysis.
- Developing and designing reservoir testing simulation models and processes.
- Conducting in-house simulation programs/studies and evaluation of field testing.
- Monitoring, analyzing and reporting technical data in a timely manner consistent with objectives.
- Providing production forecasts and optimized field development plans using the best available methods, including developing and expanding field simulation models.
- Communicating information, analyses, evaluations, ideas, theories and concepts to all levels within the organization.
- Working closely with all OQI engineering, operating and maintenance personnel to form successful, collaborative teams.
- Occasional travel to vendors, suppliers and OQI field sites may be required.

### Qualifications

- 8-12 years of engineering experience with 5+ years field experience and 3+ years direct in-situ oil sands experience.
- Qualified candidates can possess either a B.Sc. in Engineering or Diploma in Engineering Technology.
- Previous asset team experience is an asset.

If this describes you, and you thrive in a busy, fast-paced environment, this could be the position for you. We offer competitive compensation and the opportunity to grow with a great company.
